

ICCF-14

The 14th International Conference on Condensed Matter Nuclear Science

25 April 2008

**Professor Dr. Gennadi Tarasenko
Aktau State University
House 1A, Apartment 26
130000 City of Aktau 26 Microdistrict
Republic of Kazakhstan**

Dear Professor Tarasenko:

The 14th International Conference on Condensed Matter Nuclear Science is also known as the 14th Conference on Cold Fusion. It will be held in Washington DC from 10 August through 15 August 2008. As you know, this is the primary scientific conference in the field. It attracts researchers from countries around the world. The scientific problems in the field, and its promise for a new and important source of energy, are among the reasons for great interest in the field.

It is with pleasure that we send you this Letter of Invitation to participate in our conference. Your experience as Professor of Geology, Aktau State University, and your studies of other Condensed Mater Nuclear Science conditions, provide you with excellent qualifications for attending our conference. However, we can not commit to providing you with travel, hotel and conference fee support at this time. This is because any paper you propose must be approved by the Technical Program Committee, which does not meet until June 2008, and due to the current state of our financial sponsorship.

You will need to begin immediately with the procedures for obtaining a Visa, in order to have it approved in time for travel to the USA for the period of the conference. So that you can be current on requirements, we recommend that you visit the USA website http://travel.state.gov/visa/visa_1750.html for important non-immigrant visa application and required fee information.

We look forward to your participation in the coming conference and in later meetings in the same series.

Sincerely,

**David J. Nagel
General Chairman
ICCF-14**
